Our promise:
aMbooo – Highland Bamboo only stands
for exclusive premium decking, patio fence systems
and cladding made of bamboo.

aMbooo

DECKING BOARDS, FENCE SYSTEMS + CLADDING

Useful facts about bamboo:

- Bamboo grows faster than any other plant on earth.
- Bamboo generates 10% - 30% more biomass yearly compared to any other wood.
- Some bamboo species grow up to 3 feet a day.
- Bamboo has no thickness growth, stemming entirely from the ground.
- Bamboo is used to replace steel reinforced concrete in the building industry.
- Bamboo has been known for a long time as an unbeatable help against soil erosion.

Advantages and product benefits:

100% BAMBOO

As a basis we exclusively use highland bamboo.

SIMPLE AND FAST

Frontal tongue + groove and longitudinal groove enable simple, safe and quick mounting.

CLIMATE PROTECTION

Up to 3 1/4' growth a day. A giant grass with best marks for ecology.

DECKING, FENCE SYSTEM AND CLADDING

Tongue + groove short, minimized material waste during installation.

FLAME RETARDANT

According to DIN 4102 B1 and ATSM84 insensitive to ash.

TREE FREE GUARANTEE

Not a single tree needs to be cut.

LONG-LASTING

According to EN 350-2.

DURABLE AND HARD

Nearly as strong as steel and as long-lasting as tropical hard wood.

DIMENSIONALLY STABLE

No natural spiral grain as with wood. Very low absorption and contraction behaviour.

ANTI UV SHIELD

With our maintenance products guaranteed less colour change caused by UV Light.

SLIP RESISTANT

According to DIN 51097 C (Assessment group C).

PLASTICS + CERAMICS FREE

No artificial additives like plastics or ceramics.

Manufacturing of our aMbooo products

Our aMbooo decking, fence and cladding boards are produced according to the well-tried and trusted HCS (high compression strand) technology. What does this mean?

- We exclusively use high quality bamboo harvested in the highlands – no artificial additives like plastics or ceramics.
- Our bamboo is harvested in sustainably managed bamboo forests only – minimum age of each culm is 5 years!
- Our boards are extremely hard thanks to the

very high specific weight of approx 80lbs / ft³ (oak 44lbs / ft³).

- Our products are all pre-oiled.
- We exclusively use oils „Made in Germany“.
- Our bamboo culms are processed with a thermo-mechanical technology. This process has been developed by us over decades to match the requirements of a premium product.

The right CARE for aMbooo outdoor-products

We recommend to carry out the initial treatment with our aMbooo Special Bamboo Care Oil after installation (please observe the instructions given by the manufacturer).

Decking boards, fence systems and cladding boards are subject to weather incidence, such as rain, sun, wind, ice and snow and may naturally change their form and appearance due to the influence of these elements.

This aging process underlines the natural quality of the material.

With aMbooo care products the surface can be preserved in its original colour for a long time.

For pool areas we strongly recommend regular cleaning and care!

Visit our homepage ambooo.com for installation and care instructions!

Important care instructions:

Regular follow-up care with aMbooo Oil is essential when aMbooo decking is installed in the pool area because chlorinated poolwater damages the surface of the decking.

Anti UV shield

With our maintenance products we guarantee less colour change due to UV-radiation.
